> NOTABLE PROJECTS

paperboy.digital
-> actively being developed
ruby on rails, viewcomponents, rails::engines, stimulus js, turbo, dokku, gh actions, sidekiq, postgresql
```
live site
```

podcasts.paperboy.digital
weekly personal podcast digest and podcast comsumption portal.
<open-source>
-> active with few dozen subscribers

ruby on rails, stimulus js, turbo, hotwire, dokku, aws ses, gh actions, redis, sidekiq, postgresql
```
live site – source code
```

youtube-channels-api
api for getting youtube channels episodes without google dependencies
ruby on rails, redis, sidekiq, postgresql
```
rapidapi.com/ccozkan/api/youtube-channels-api
```

showhn.paperboy.digital
automatically generated "show hackernews" newsletter
<open-source>
-> active with ~100 subscribers
ruby on rails, dokku, aws ses, gh actions, redis, sidekiq, postgresql, haml
```
live site – source code - blogpost - videopost
```

instauto
bot for scheduling multiple instagram photo posts for multiple accounts
python
```
demo video
```

pdfbirlestir.com
web site for merging multiple pdf documents into one file
> merged over 3 gigabytes of pdfs
php, nginx, digitalocean
```
live site
```
